- A. collects B. hides C. shouts D. appears
- 五. 阅读

iPod is one of the most popular MP3 players today. But do you know how to use your iPod? Let me tell you.

1. Find the latest iTunes version (版本) from the Apple's website.
2. Download iTunes to your computer.
3. Put your MP3 music library to iTunes main playlist (播放列表).

If your iPod is empty and you only want to use it on one computer:

4. Connect your iPod to your computer and let it automatically to your new music playlist at the same time. That is to say you don't need to do anything.

If your iPod is not empty and you don't want to lose the songs in it, look at these instructions for your iPod:

4. (again): Go to the iTunes and change the settings (设置) for your iPod.
 5. If you want every new song from your computer to your iPod, just move the music from your computer to your iPod.
 6. Don't forget to let your iPod out before removing it out of your computer.
- There's so much more you can do with your iPod. You can put photos into it, play games, make your own CDs... If you want more information, please click the website: [http:// hubpages.com / hub / ipod_instructions](http://hubpages.com/hub/ipod_instructions).
