at most by the words of experts.
A 10kg B 8kg C 6kg D 7kg
5 If students follow the doctor's suggestions they
A may lighten their backpacks
B can learn how to help themselves
C may feel their backpacks are lighter
D will know how to wear backpacks
D will know now to wear backpacks
Now satellites(卫星)are helping to forecast(预报)the weather. They are in space and they can
reach any part of the world. The satellites take pictures of the atmosphere(大气), because this is
where the weather forms(形成)。 They send these pictures to the weather station. So
meteorologists(气象专家)can see the weather of any part of the world. From the pictures, the
scientists can often say how the weather will change.
Today, nearly five hundred weather stations in sixty countries receive satellite pictures. When they
receive new pictures, the meteor-ologists compare(比较) them with earlier ones. Perhaps they may
find that the clouds have changed during the last few hours. This may mean the weather on the
ground may soon change, too. In their next weather forecast, the meteorologists can say this.
So the weather satellites are a great help to the meteorologists. Before satellites were invented, the
scientists could forecast the weather for about 24 or 48 hours. Now they can make good forecasts
for 3 or 5 days. Soon, perhaps, they may be able to forecast the weather for a week or more
ahead(提前)
6. Satellites travel
A in space B in the atmosphere C above the ground D above space
7. Why do we use the weather satellites to take pictures of the atmosphere? Because
A the weather satellites can do it easily B clouds form there
C the weather forms there D the pictures can forecast the weather
8. Meteorologists forecast the weather
A when they have received satellite pictures
B after they have compared new satellite pictures with earlier ones
C before they receive satellite pictures
D while they study satellite pictures
9. Maybe we'll soon be able to forecast the weather for
A one day B two days C five days D seven days or even longer
10. The main idea of this passage is that satellite are now used in

A taking pictures of the atmosphere B receiving pictures of the atmosphere
C doing other work in many ways D weather forecasting
V. 根据短文内容及首字母提示,填写所缺单词,使短文意思完整。(10个小题, 共 20
分)
Will it matter if you don't take your breakfast? A short time ago, a test w1_ given in the
United Stated. People of different a 2, From 12 to 83, were asked to have a test. During the
test, these people were given all kinds of breakfasts and s3they got no breakfast at all.
Scientists wanted to see how well t4_bodies worked when they had different kinds of
breakfasts.
The results show that if a person e_5a right breakfast, he or she will work better than if he
or she has no breakfast. If a student has fruit, eggs, bread and milk b6_ going to school, he
