A

We live in a "computer age". Scientists, teachers, writers and students use computer to do all kinds of work. But more than 30 years ago, computers couldn't do much. They were very big and expensive. Very few people were interested in them and knew how to use them. Today computers are smaller and cheaper. Since they can do a lot of work, many people like to use them. Some people even have them at home.

Computers become very important because they can work faster than people and make fewer mistakes (错误). Computers can help people do a lot of work. Writers now use computers to write books, teachers use them to help teaching, students use them to study. Computers can also remember what you put into them. Computers are very useful and helpful. They are our good friends.
